

ISV Series BF1EU & BF2EU

Forged Construction **High Pressure Floating Ball Valve**

wegman

Est. 1797

ASME Class 600, 900 & 1500

For Oil & Gas Production, Refining, Chemical, Power & Industrial processing applications

**1/2" through 2"
sizes**

**ASME B16.34
Code Compliant**

End Connection options:

**Flanged Ends
Butt-Weld Ends

Male & Female
Threaded Ends
Socket Weld Ends**

DESIGN FEATURES

3 piece bolted body design- Replaceable body section

*Double stem Sealing:
Adjustable live loaded packing plus o-ring stem seal*

Integral extended end connection configurations

PEEK seats for higher pressure performance

A105N, LF2, F316 & alloy material options

Locking Lever is standard

Pressure tested to API 598 / API 6D

Fire safe tested to API 607, Meets NACE

ISO drilled actuator mounting pad

The valves described in this brochure are
designed, assembled and tested in Stafford, Texas USA.
Contains domestic and/or internationally produced components.

QUALITY MANAGEMENT SYSTEM
CERTIFIED BY DNV
ISO 9001:2008

ISV - Stafford, Texas - Overview

ISV is committed to providing high value products to our customers by producing the highest of quality products and the finest service in the industry at a competitive cost of ownership. Activities are conducted from our 40,000 square foot facility in Stafford, Texas.

Engineering & Design

ISV valves are designed utilizing the latest engineering technologies enabling fast precise solutions to demanding valve applications. Product engineering/design packages are prepared in-house.

ISV can provide a wide range of product configurations to meet with customer special design and feature requirements.

Final Assembly & Testing

All ISV ball valves are manufactured in strict accordance with industry standards and ISV Product Design Specifications whether produced domestically or internationally. Final assembly & testing of selected ISV products is performed in-house by well trained qualified personnel in a safe & ecologically responsible environment.

Year 2012 USA production capacity exceeded 1700 pieces per month.

The result is consistently high product quality & reliability.

Quality Control

ISV's Quality Management System is maintained at all levels of production in accordance with ISO 9001 and API Q1.

Each valve is serialized.

Material test reports including chemical and mechanical material characteristics and pressure test results are available with each valve.

Each ISV valve undergoes pressure testing to applicable standards.

Each valve carries full ISV warranty and warranty services.

The result is high product quality & lower total cost of ownership.

Accurate Inventory & Documentation

All ISV products, component parts, material certifications, material verifications, serialization, performance tests, order entry, shipping & receiving is managed through computerized ERP system. Products are bar code labeled for improved accuracy.

The result is fast, accurate, reliable service and documentation.

Customer Service

ISV customer service & material handling staff are fully trained and ready to help with your technical and logistical requirements.

Most quotations and order shipments are performed on the same day of request.

All photographic images in this brochure are taken at International Standard Valve's facility in Texas.

* Use ESW Series

All "L" dimensions are from centerline of valve. Combine two "L" dimensions to determine the overall valve end-to-end length.

Example:

To Calculate the overall valve length of a 3/4" Female THD End X Female Extended SW End, **add L1 + L3 = overall length.**
3/4" size : 2.165" (L1) + 4.035" (L3) = 6.20" (overall length).

See "Specifying ISV Series BF2E" on page 8 to identify and specify the configuration options with the valve figure number.

International Standard Valve, Inc.

Specifying ISV Series No. BF1EU & BF2EU - USA Production

Specifying ISV Three Piece Floating Ball Valves *Example: ISV figure number BF1EU-F150-1136RF-PV-NFL*

Describes an ASME class 1500, 3 piece bolted body design, full port, floating ball valve, raised face flange ends, A105N body (associated valve materials for -20 degrees F. service), Stainless Steel trim, PEEK seat inserts, Viton seals, meets NACE, is fire safe tested, lever operated. Assembled & tested in the USA.
